borderless world**

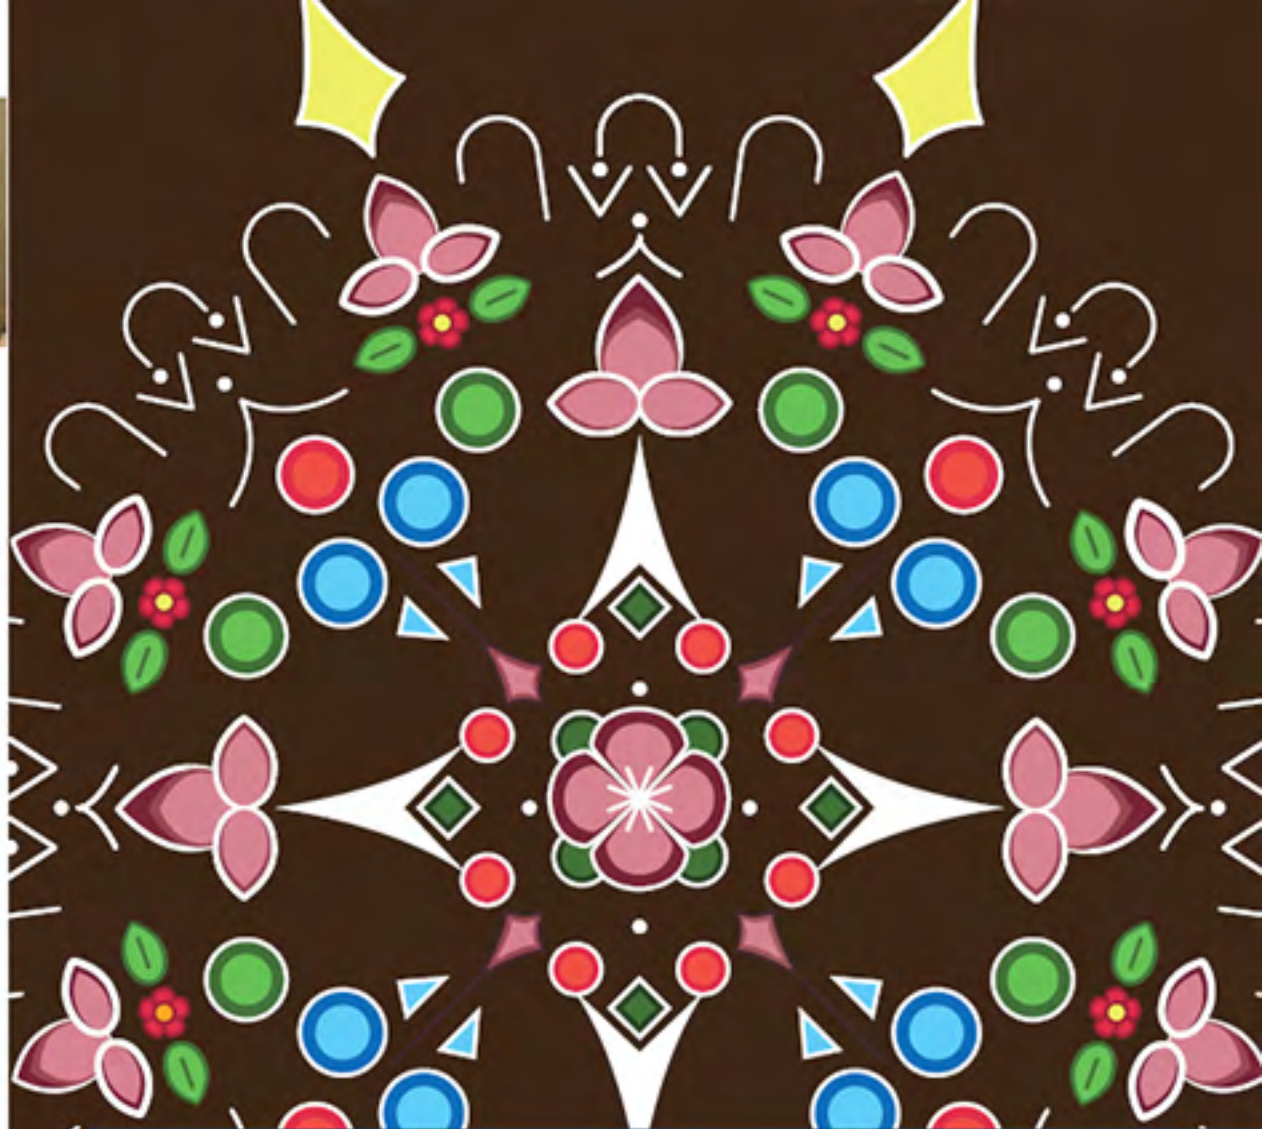

Kalyani
International
School

Holistic, nurturing education that gives children the skills to compete, survive, and blossom in a borderless world

Kalyani School challenges traditional educational paradigms by bringing to America a grade school scheme built for an ever more borderless world, one which cries out for harmony between people of dissimilar backgrounds, for respect of the Earth's fragile natural resources and for skilled critical thinkers.

At Kalyani School, we use holistic learning methods to nurture children, yet give them the skills to compete, survive, and blossom in an international, global world. We provide children with the tools to develop and embrace important skills such as:

- Empathy and cooperation;
- Originality, play and positive thinking;
- Conflict management;
- Critical thinking;
- Etiquette and personal hygiene;
- Money management;
- Agricultural awareness;
- Kinship with nature;
- Engineering; and
- Woodworking.
